

**Cashel, LLC Enters the Utility Sink Category with Proven Designs from a Three-Decade Expert in Commercial and Industrial Plastic Products.**

*Cashel Utility Sinks, Trash Cans and Recycling Containers Debut at the 2016 National Hardware Show, Made In America Section, Booth #8462*

*Enter to Win a Can of Cash at the National Hardware Show – Booth #8462*

Havertown, Pennsylvania – March 23, 2016

Cashel, LLC, a Havertown, Pennsylvania based company, has entered the utility sink, residential trash can and recycling container category and will debut its new line of products at the 2016 National Hardware Show, Las Vegas, May 4-6, 2016. Cashel manufactures all of its sink, trash can and recycling container plastic components in Pennsylvania and will be previewing products in the Made In America section of the National Hardware Show.

Cashel, LLC launched in 2016 with the leadership of its sister company, TMF Corporation, T. M. Fitzgerald & Associates, (tmfcorporation.com)–a three-decade respected expert in commercial and industrial plastic products. “Cashel invested in utility sink designs, tooling, sales and marketing support and an experienced leadership team to bring back proven utility sinks that were previously successful in the marketplace.” said Tom Fitzgerald, Jr., Managing Partner, Cashel, LLC. “Our focus is our customers and how we can help them drive sales and profits. We are confident that these products are best-sellers because there is a proven record of accomplishment in the utility sink market with these sought-after designs,” said Fitzgerald.

The Cashel utility sink premiere collection features five utility sinks available in single, multi and bulk packages. Cashel utility sinks range from a standard, opening price point utility sink to an upgraded feature-loaded all-in-one kit with a metal towel rack and a chrome pull out faucet. Cashel manufactures the plastic sink components for the entire collection of Cashel utility sinks in Eastern Pennsylvania. The same facility assembles the entire product from start to finish using best-in-class imported components so that all models ship from Eastern Pennsylvania. Cashel sources packaging and product marketing collateral from facilities within fifty miles of the company’s headquarters and sink manufacturing facility.

Cashel will also preview its new brand of residential trash and recycling containers at the 2016 National Hardware Show. Products include 20, 25, and 32-gallon containers, with and without lids.

## Press Release

Customers have the opportunity to pick their color and customize their logo. “We are excited to bring a fresh new brand of residential trash and recycling containers to this market. Our products have stood the test of time on the curbside in townships and municipalities, since 1994. We feel strongly that the residential home hardware market will find our trash and recycling containers to be of the finest quality and we’re looking forward to new customers that will have the opportunity to experience our exceptional customer service,” said Fitzgerald.

To celebrate the company’s debut at the National Hardware Show, Cashel is sponsoring a Can of Cash sweepstakes. One lucky contestant will win a Cashel trash can and a check equal to the amount of cash it takes to fill the can. Enter to win at the Cashel booth # 8462, Made in America section, at the National Hardware Show. Visit [CashelLLC.com](http://CashelLLC.com) for contest rules and details.
